

## macromolecule metabolic process

biological regulation

regulation of macromolecule metabolic process

organic substance metabolic process

metabolic process

cellular protein metabolic process

cellular component organization or biogenesis

primary metabolic process

macromolecule modification

cellular aromatic compound metabolic process

organic cyclic compound metabolic process

heterocycle metabolic process

nucleobase-containing compound metabolic process

cellular macromolecule metabolic process

positive regulation of cellular process

cellular component organization

nitrogen compound metabolic process

regulation of cellular metabolic process organelle organization

regulation of primary metabolic process

regulation of nitrogen compound metabolic process

cellular metabolic process

cellular nitrogen compound metabolic process

regulation of cellular process

regulation of biological process

protein modification process

cellular component biogenesis

cellular protein modification process

cellular component assembly
